First 2016 Semester

- 1 March - **Dee Bradshaw** - The role of minerals and metals in our sustainable future
8 March - **Mike Venter** - East African graphite projects - a synopsis
15 March - **Richard Katz** - Variations in MOR magmatism and carbon emissions driven by glacial cycles
22 March - **Richard Kahle** - Geophysics topic
29 March - **Vac week** - no seminar
5 April - **Ellwin Shiimi** - Proterozoic sub-continental lithospheric mantle beneath southern Africa : An investigation of garnet and spinel peridotites
12 April - **Petrus le Roux** - TBA
19 April - **Kenneth Chukwuma and Claire Geel** - Diagenetic, thermal and provenance histories of the Permian lower Ecca Group
26 April - **Emese Bordy and Lara Sciscio** - The Triassic/Jurassic boundary in South Africa
3 May - **Phil Janney** - topic on mantle geochemistry
10 May - **Chelsea Rebelo** - TBA
17 May - **Claire Browning and Mhairi Reid** - Sedimentology of the Late Ordovician Soom Lagerstätte and the Lower Devonian Voorstehoek Fm, Bokkeveld Group
24 May - **Joré von Holdt** - Small-scale source geomorphology of desert dust in the Namib and the micro-scale characteristics that control erodibility

Eric Simpson Lecture Theatre 13h00-13h45
